WHAT IS SHARE MARKET

The stock market is one of the **most important sources** for companies to raise money. This allows businesses to be publicly traded, or raise additional capital for expansion by selling shares of ownership of the company in a public market.

WHAT IS A STOCK?

- A share of stock represents partial ownership in a corporation---like Apple, Pepsi or Hershey's, for example.

- A share of a corporation can be held by an individual, group or another company.

Who Is an Investor

► An investor is any person or other entity (such as a firm or mutual fund) who commits capital with the expectation of receiving financial returns. Investors utilize investments in order to grow their money and/or provide an income during retirement, such as with an annuity .

What does the investor want?

Why should invested in stock market?

Stock Market investments offer you benefits like

- ✓ Liquidity
- ✓ Flexibility of amounts invested
- ✓ Operated under high level of regulatory framework to safeguard investor rights
- ✓ Technology based Investment
- ✓ High return
- ✓ Capital growth
- ✓ Dividend

1.CAPITAL MARKET

2.DEBT MARKET

3.DERIVATIVE MARKET

4.CURRENCY MARKET

5.COMMODITY MARKET

Investment Vs trading

- ✓ Investors are more interested in fundamentals.
- ✓ Investors hold for the long-term
- ✓ usually Investors hold a wide range of portfolio
- ✓ Most investors adopt a “buy and hold” approach to assets.

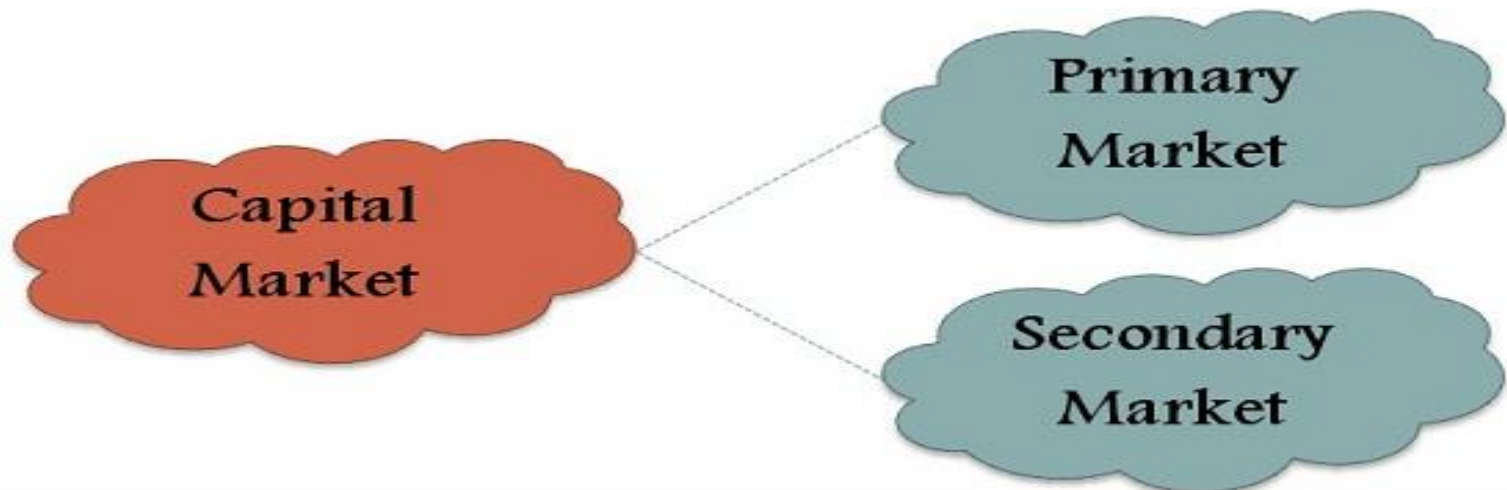

- ✓ Traders are more interested in technical.
- ✓ Traders hold for the short term.
- ✓ Traders hold small basket of portfolio.
- ✓ Trader always adopt buy and use stop loss approach

Capital Market

What is capital market ?

A platform where individuals and institutions buy and sales financial securities. Organizations and institutions in the public and private sectors also often sell securities in order to raise funds.

What Is Initial Public Offer (IPO)

Initial Public Offer (IPO) is when an unlisted company makes fresh issue of securities for the first time to the public. Any unlisted company can raise money from public through this process.

What is stock exchange ?

Stock Exchange is the platform where investors can Buy / Sell their financial instruments like stocks, shares, bonds, mutual funds and other financial derivative products.

Once a company's public offering is completed, it gets listed on a Stock Exchange. After listing it is available for trading to all investors in the Stock Exchanges where they are listed.

In India we have two main stock exchanges

National stock exchange was established in 1992. Nifty is a index of NSE having 50 shares and one DVR of Tata motors

Bombay stock exchange was established in 1875 and it is the oldest stock exchange in Asia. Sensex is the index of BSE having 30 stocks.

Apart from this we have 24 regional stock exchanges which are located in different places of India .

Market Index

There are thousands of stocks listed on the exchanges. On a daily basis we do not have the time to look at all the rates and at one glance we want some indicator that will give us an idea about what's going on in the market today.

Stock index is metric that tracks the performance of the individual or group of stocks, it designed to indicate the performance of the market.

- ✓An Index is a number which measures the change in a set of values over a period of time.
- ✓The Index represents the change in value of a set of stocks which constitute the Index.
- ✓A good stock market index is one which captures the behavior of the overall equity market. It has to be well diversified yet highly liquid.

Major Indices in India

- ✓ **CNX Nifty** – Nifty is an Index created by NSE and has 50 stocks from various sectors.
- ✓ **SENSEX** - SENSEX is an Index created by BSE and comprises of 30 stocks.
- ✓ **Bank Nifty**
- ✓ **CNX nifty junior**
- ✓ **CNX 100**
- ✓ **CNX 200**
- ✓ **CNX 500**
- ✓ **CNX IT**
- ✓ **CNX Midcap**
- ✓ **CNX Small cap**

What is Market Capitalization?

It is current market value of the company's shares.

Indicates sheer size of company, its stock's liquidity.

Based on Market Cap companies are classified as Large Cap, Mid Cap and Small Cap.

Market Capitalization = Current Stock Price x Shares Outstanding

Let's assume Company ABC LTD has 10,000,000 shares outstanding and the current share price is Rs 9.

Based on this information and the formula above, we can calculate that

Company ABC LTD market capitalization is $10,000,000 \times \text{Rs}9 = \text{Rs } 90 \text{ million}$

Market Timings of NSE & BSE

Trading on the equities segment takes place on all days of the week (except Saturdays, Sundays and Holidays declared by the exchange in advance).

The market timings of the equity segment are as follows:

Pre open session timings (NSE and BSE): 09:00 am to 09:15 am.

Pre open orders can be placed only for Equity cash segment stocks which constitute the Index (Nifty50 & Senex30). The orders can be placed in price band of (+) 20% to (-) 20% of the previous day closing price of the stock.

Normal Market timings (NSE and BSE) : 09:15 am to 03:30 pm.

Post Closing timings (NSE and BSE) : 03:40 pm to 04:00 pm.

MARKET DEPTH WINDOW

STOPLOSSORDER

Investors used Stop Loss to minimize the losses

All stop loss orders entered into the system are stored in the stop loss book. Every stop loss order is associated with two prices.

Trigger Price : It is the price at which the order gets triggered from the stop loss book.

Limit Price : It is the price for orders after the orders get triggered from the stop loss book. If the limit is not specified, the trigger price is taken as the limit price for the order.

The stop loss condition for buying and selling orders

Sell Order : A sell order in the stop loss book gets triggered when the last traded price in the normal market reaches or falls below the trigger price of the order.

Buy Order : A buy order in the stop loss gets triggered when the last traded price in the normal market reaches or exceeds the trigger price of the order.

TICKSIZE

A **tick size** is the minimum increment / decrement(tick) by which the price required between two prices quotes while entering the order into the system.

We can say tick size is the minimum difference between the buyer and seller can placed orders. Such as 5 paisa or 1 paisa

LOT SIZE

Minimum trading unit is a lot size of a contract to be traded in the market.
i.e. 1 share The Quantity are in Units and Prices are in Indian Rupees

Example

Lot Size of NIFTY – 25

Lot Size of Bank NIFTY – 25

Lot size may varied from instrument to instruments, and it can be change at any point of time with prior notice and circular

what is order management?

Order Management consists of order punching, order modification, order cancellation and order matching.

Time condition

Condition of orders

Phases of order

Active order

Passive order

- ✓ Day order - order validated only for the day
- ✓ GTC order - An order to buy or sell a security at a set price that is active until the investor decides to cancel it or the trade is executed.
- ✓ IOC order - immediate or cancel (as the name suggests either it gets executed or cancelled automatically)

Price condition

- ✓ Market price order - A market order is a buy or sell order to be executed immediately at current market prices.
- ✓ Limit order - A limit order is an order to buy a security at no more than a specific price, or to sell a security at no less than a specific price

When any order enters the trading system, it is an active order. It tries to find a match on the other side of the books. If it finds a match, a trade is generated. If it does not find a match, the order becomes a passive order and goes and sits in the orderbook

Order Matching

The buy and sell orders are matched on Book Type, Symbol, Series, Quantity and Price to perform a complete order. The Orders can be matched on the basis of price and time.

ByPrice

Buy order with a higher price gets a higher priority and similarly, a sell order with a lower price gets a higher priority. E.g.

Consider the following buy orders:

1)100 shares @ Rs. 35 at time 9:30 a.m.

2)500 shares @ Rs. 35.05 at time 9:43 a.m.

The second order price is greater than the first order price and therefore is the best buy order.

ByTime

If there is more than one order at the same price, the order entered earlier gets a higher priority. E.g. consider the following sell orders:

1)200 shares @ Rs. 72.75 at time 9:30 a.m.

2)300 shares @ Rs. 72.75 at time 9:35 a.m.

Both orders have the same price but they were entered in the system at different time. The first order was entered before the second order and therefore is the best sell order.

What is Depository?

Depository is like an institution that works like a Bank, bank is actively involved in lending and borrowing of funds, same as depository is involved in receiving and transferring of securities. Like bank holds the funds of the investors , similarly depository holds the securities of investor.

Parties involved in Depository System:

- ✓ Depository: facilitates the smooth flow of trading and ensure the investor`s about their investment in securities
- ✓ Depository Participant(DP): provides the service of opening a DEMAT account to the investor.
- ✓ Investor: Individuals investing in securities.

Depositories in India:

We have 2 depositories in India which are well known as NSDL (National securities depository limited) and CDSL (Central Depository Services (India) Limited).

Sub Broker

As per NSE A 'Sub-Broker' is any person who is not a Trading Member of a Stock Exchange but who acts on behalf of a Trading Member as an agent or otherwise for assisting investors in dealing in securities through such Trading Members.

All Sub-Brokers are required to obtain a Certificate of Registration from SEBI without which they are not permitted to deal in securities.

SEBI has directed that no Trading Member shall deal with a person who is acting as a Sub-Broker unless he is registered with SEBI and it shall be the responsibility of the Trading Member to ensure that his clients are not acting in the capacity of a Sub-Broker unless they are registered with SEBI as a Sub-Broker.

It is mandatory for Trading Members to enter into an agreement with all the Sub-Brokers.

The agreement lays down the rights and responsibilities of Trading Members as well as Sub-Brokers.

Stock Broker is a member (individual or the Organization) of recognized stock exchange. Who is permitted or specially given license to participate in stock market / securities market on behalf of the clients who are register with the stock broker.

Stock broker pay an important role in facilitating the trading activities, for the same the stock broker take some commission , that commission is called brokerage.

As per NSE guidelines the Stock Broker can not charge morethan 2.5% brokerage of the transactions.

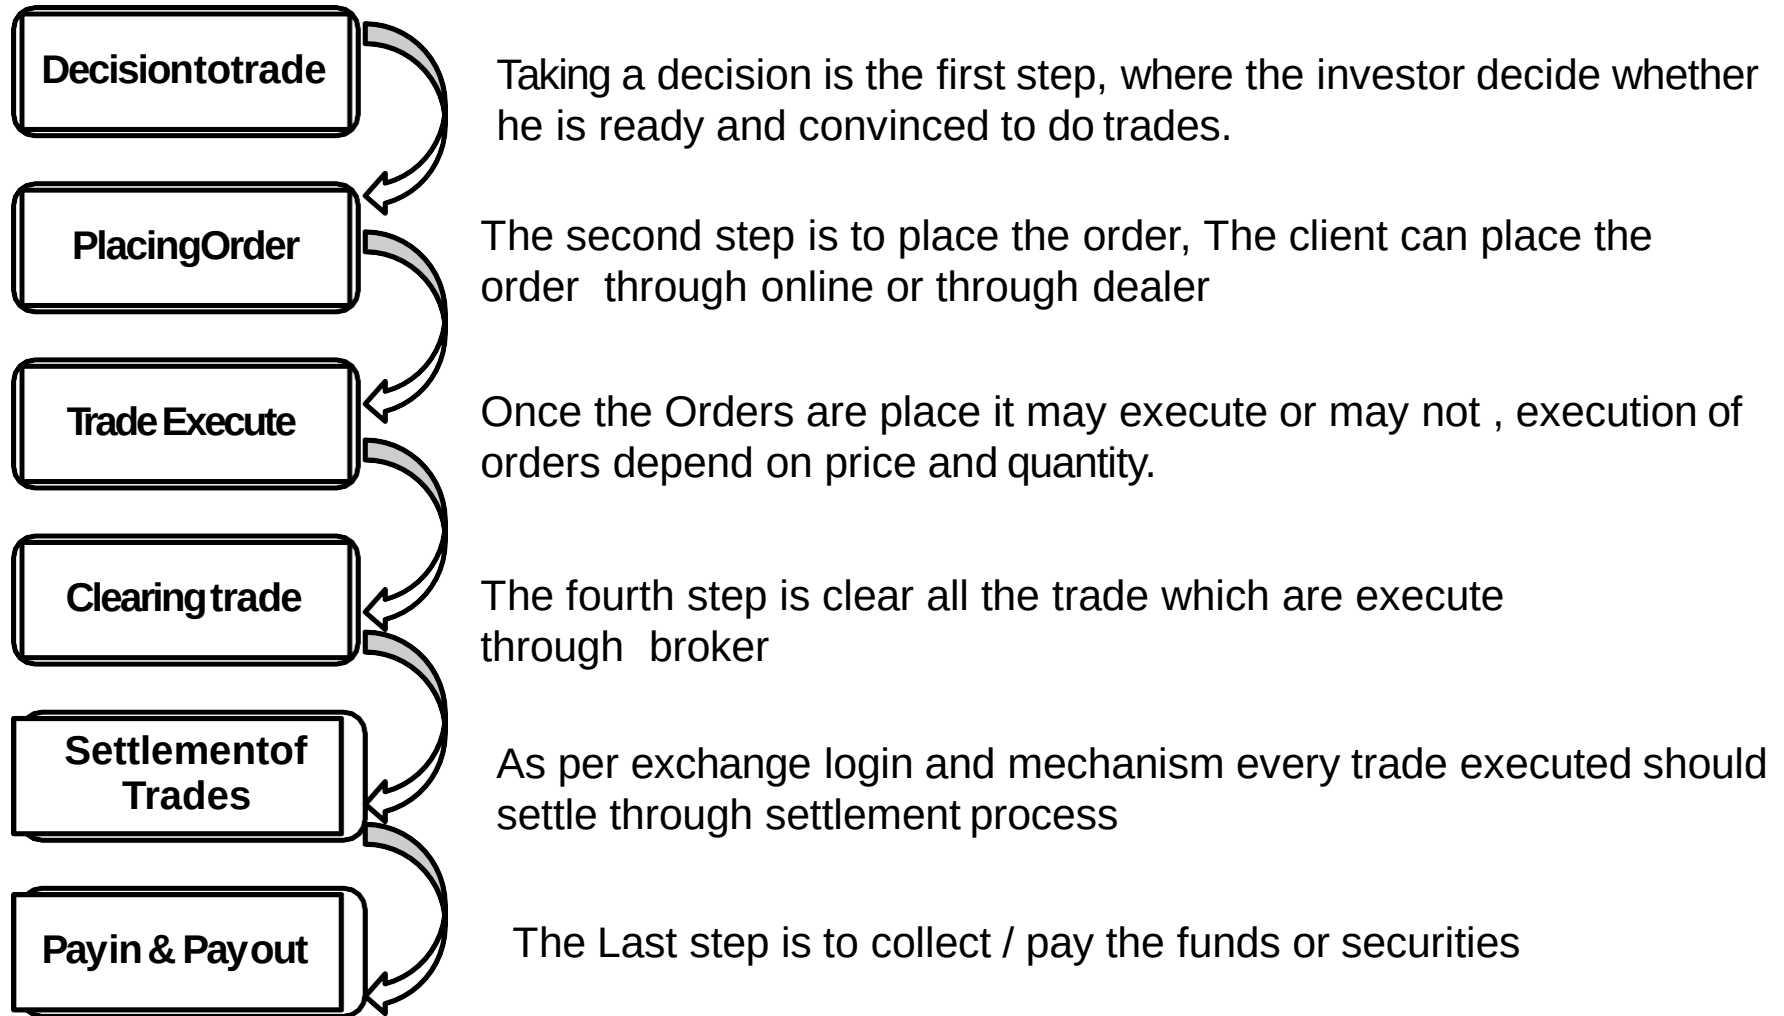

Example – Client Aexecute a bought 1000 quantity SBIN @ 2350 per share through XYZ sub broker , for this transaction XYZ sub broker can not charge more than

Rs 58750 as brokerage

$= (1000 * 2350) = 2350000$

$= (2350000 * 2.5\%) = \text{Rs}58750$

How the trade take place

PRICE BANDS

Daily price bands are applicable on securities as below:

- ✓ **Daily price bands of 2% (either way)**
- ✓ **Daily price bands of 5% (either way)**
- ✓ **Daily price bands of 10% (either way)**
- ✓ **Daily price bands of 20% (either way)**
- ✓ No price bands are applicable on scrip's on which **derivative products** are available
- ✓ Price bands of 20% (either way) on all remaining scrip's (including debentures, preference shares etc).
- ✓ Scrip's on which no derivatives products are available but which are part of Index Derivatives, are also subjected to price bands.

Circuit Breakers

The market shall re-open, after index based market-wide circuit filter breach, with a pre-open call auction session. The extent of duration of the market halt and pre-open session is as given below:

Trigger limit	Trigger time	Market halt duration	Pre-open call auction session post market halt
10%	Before 1:00 pm.	45 Minutes	15 Minutes
	At or after 1:00 pm upto 2.30 pm	15 Minutes	15 Minutes
	At or after 2.30 pm	No halt	Not applicable
15%	Before 1:00 pm	1 hour 45 minutes	15 Minutes
	At or after 1:00 pm before 2:00 pm	45 Minutes	15 Minutes
	On or after 2:00 pm	Remainder of the day	Not applicable
20%	Any time during market hours	Remainder of the day	Not applicable

CLEARING and SETTLEMENT

After a trade is executed, it needs to be settled. The clearing and settlement mechanism in Indian securities market has witnessed significant changes . These include use of the state-of-art information technology, emergence of clearing corporations to assume counterparty risk, shorter settlement cycle, dematerialization, electronic transfer of securities and fine-tuned risk management system.

T+2 rolling settlement was introduced for all securities. Rolling settlement refers to the settling of trades at a standard fixed period of days after the execution occurred. In a rolling settlement, each trading day is considered as a trading period and trades executed during the day are settled based on the net obligations for the day.

NSCCL

What is contract note?

Contract Note is a confirmation of trades done on a particular day on behalf of the client by a trading member. It imposes a legally enforceable relationship between the client and the trading member with respect to purchase/sale and settlement of trades. It contains the details of trades, stamped with requisite value and duly signed by the authorized signatory.

What is an ISIN?

ISIN (International Securities Identification Number) is a unique identification number for a security

Who is a broker?

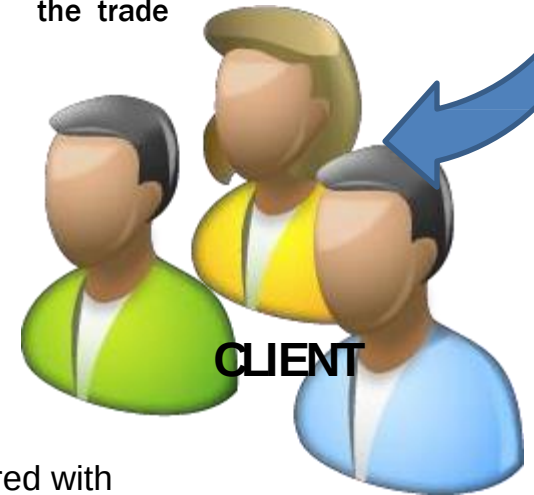

A broker is a member of a recognized stock exchange, who is permitted to do trades on the screen-based trading system of different stock exchanges. He is enrolled as a member with the concerned exchange and is registered with SEBI.

Who is a sub broker?

A sub broker is a person who is registered with SEBI as such and is affiliated to a member of a recognized stock exchange

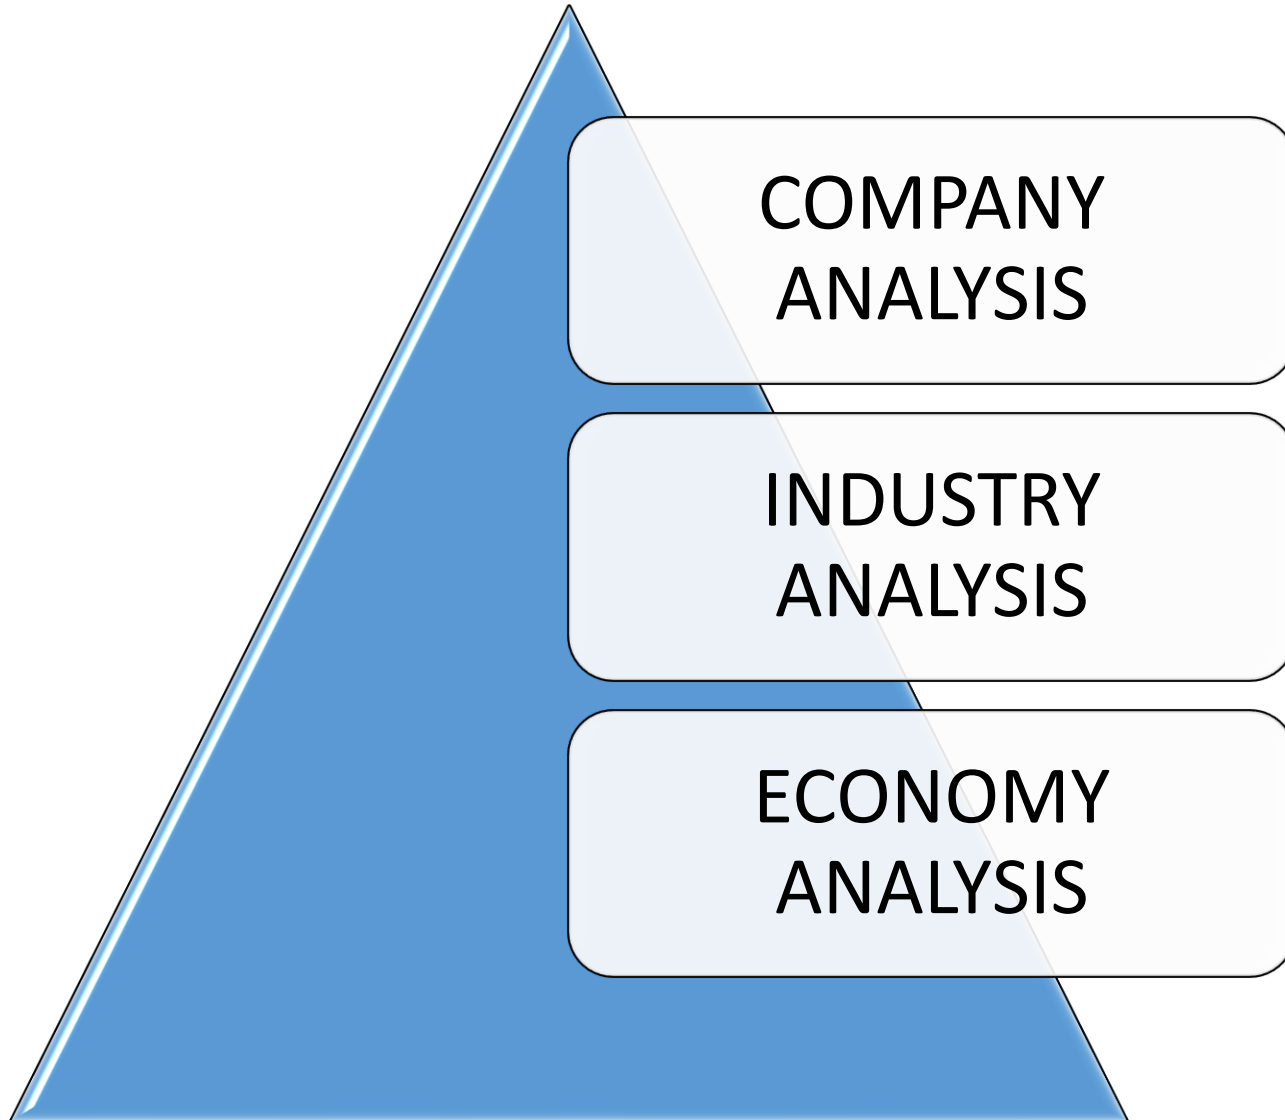

Broker issues a contract note to the client within 24 Hrs of the trade

An introduction to derivative Market

What is derivative?

Derivative is a product whose value is derived from the value of one or more variables, The variables are called underlying. In financial market the underlying assets can be:

- Stocks**
- Bonds**
- Commodity**
- Interest rate**
- Foreign exchange**

The price of the derivative products solely depend on the price of the underlying.

Why Derivatives ?

Pricediscovery

Derivatives play a crucial role in discovering the present and future price of any commodity or financial asset.

Riskmanagement

Derivatives are instruments meant to cover risks.

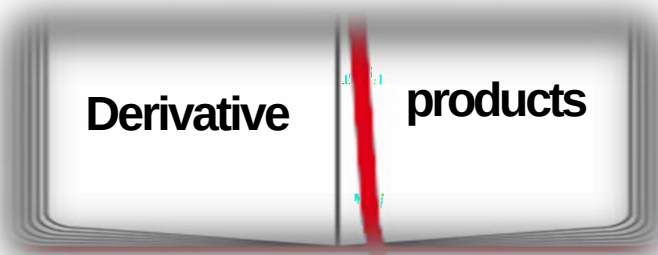

Hedging

Investors hedge their financial assets through derivatives.

Speculation

Investors use financial instruments for speculative purposes.

Basic Derivative Products

What is future contract ?

A futures contract is an agreement between two parties to buy or sell an asset at a certain time in the future at a certain price. Futures contracts are standardized, exchange-traded contracts. Futures contracts are available on variety of commodities, currencies, interest rates, stocks and other tradable assets. They are highly popular on stock indices, interest rates and foreign exchange.

The buyers of futures contracts take long position whereas the sellers built up short position. It should be noted that this is similar to any asset market where anybody who buys is long and the one who sells is short.

Futures can be used either to hedge or speculate on the price movement of the underlying asset.

Terminology in derivatives

- ✓ Spot price
- ✓ Future price
- ✓ Contract cycle
- ✓ Expiry date
- ✓ Contract size

Contract size - It represents the standardized quantity of financial instrument. It is the minimum quantity that has to be traded.

Spot price - The price at which asset trades in the cash market.

Futures price - The price at which the future contract trades in future market.

Contract cycle - The period over which a contract trades, the index future contract have 3 months trading cycle.

Expiry date - The last trading day of a future contract (usually last Thursday of the month consider as expiry day). It is the day on which a derivative contract ceases to exist.

Participants in Derivative Market

Following are the categories of participants in derivatives market.

Speculator

These are individuals who take a view on the future direction of the markets. They take a view whether prices would rise or fall in future and accordingly buy or sell futures for making profit/losses.

Hedger

These are investors with exposure to the underlying asset which is subject to price risks. Hedgers use the derivatives markets primarily for price risk management of assets and portfolios.

Arbitrageurs

They take positions in financial markets to earn riskless profits. Arbitrage is a deal that produces profit by exploiting a price difference in a product in two different contracts or markets.

Margin mechanism

SPAN MARGIN

MTM MARGIN

PREMIUM MARGIN

SPAN is to identify overall risk in a portfolio of futures and options contracts for each member. **SPAN** calculated worst possible one-day move. Investor has to provide **SPAN** margin on up front basis.

In the futures market, at the end of each trading day, the margin account is adjusted to reflect the investor's gain or loss depending upon the futures closing price. This is called **marking-to-market**

Premium Margin is charged to trading members trading in Option contracts. The **premium margin** is paid by the buyers of the Options contracts and is equal to the value of the options premium multiplied by the quantity of Options purchased

Example

If 1000 call options on ABC Ltd are purchased at Rs. 20/- , then the premium margin will be Rs. 20,000

NSE MARGINS in FUTURES

What is pay off?

Pay off is an amount required to pay or receive in full and final settlement. It is final profit and loss of a trade.

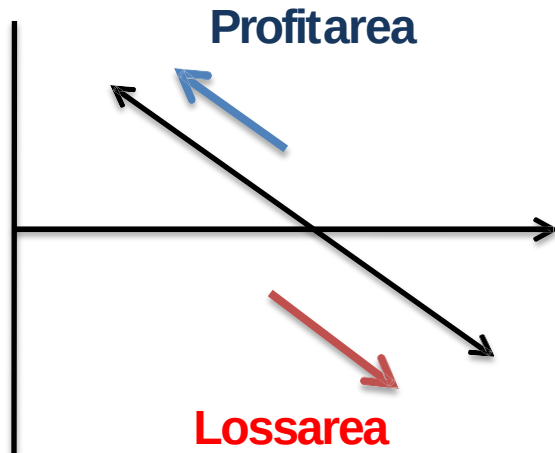

Long future pay off

Profit area

Aspeculator who buys a two-month Nifty index futures contract when Nifty stands at 5100. The underlying asset in this case is Nifty portfolio. When the index moves up, the long futures position starts making profits, and when index moves down it starts making loss

Short future payoff

The payoff for a person who sells a futures contract is similar to the payoff for a person who shorts an asset. He has potentially unlimited upside as well as potentially unlimited downside

What is an option ?

An option is a contract that gives the buyer the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date. An option, just like a stock or bond, is a securities.

USE Example – Check prices of Futures

- 1 Nifty
- 2 Bank Nifty
- 3 DLF
- 4 TATA STEEL
- 5 SBIN

Introduction to Options

An option is a contract that gives the right, but not the obligation, to buy or sell an underlying asset at a specific price on or before a certain date. The party taking a long position i.e buying the option is called buyer/holder of the option and the party taking a short position i.e selling the option is called the seller/ writer of the option.

Option Applications

Type of options

CALL OPTION

PUT OPTION

CALL OPTION

A call gives the holder the right to buy an asset at a certain price within a specific period of time. Calls are similar to having a long position on a stock. Buyers of calls hope that the stock will increase substantially before the option expires.

Buy a call option bullish
about stock or index.

Sell a call option
Bearish on stock or index

USE Examples

- 1
- 2
- 3
- 4
- 5

Put option

PUTOPTION

A put gives the holder the right to sell an asset at a certain price within a specific period of time. Puts are very similar to having a short position on a stock. Buyers of puts hope that the price of the stock will fall before the option expires.

Buya Put option

Bearish about stock or index.

Sell a put option

bullish about stock or index.

Option Terminology

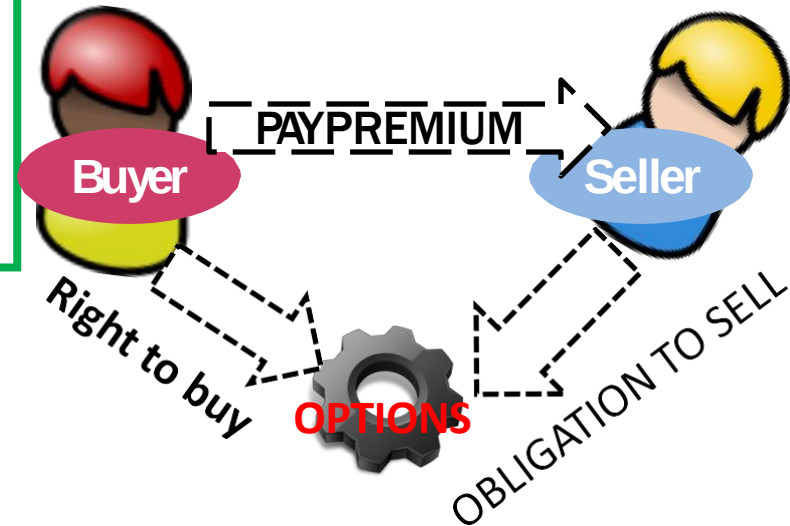

Index options: These options have index as the underlying asset. For example: Options on Nifty , Sensex etc.

Stock options: These are options on individual stocks as the underlying asset .

They can be European or American. For example: option on ONGC & NTPC .

Buyer of an option: The buyer of an option is the one who has buy the option and pay premium to the seller.

Seller of an option: The Seller of a call/put option is the one who sells the options and receive the premium.

Option Terminology

Option price/premium: It is the price which the option buyer pays to the option seller. It is also referred to as the option premium.

Expiration day: The date specified in the options contract is known as the expiration Day.. It is the last trading date/day of the contract.

Strike price: The price specified in the options contract is known as the strike price or the exercise price. The price at which specific derivative contract can be exercised.

American options: These are the options that can be exercised at any time up on or before the expiry day of the contract.

European options: These can be exercised only on the expiry date . In India, Index options are European.

What Is Currency future?

Currency futures is a standardized contract, traded on an exchange, to buy or sell a certain underlying asset or an instrument at a certain date in the future, at a specified price. Here the underlying asset is Currency.

History of currency future in India.

- Currency futures trading was started in Mumbai on August 29, 2008.
- With over 300 trading members including 11 banks registered in this segment, the first day saw a very lively counter, with nearly 70,000 contracts being traded.
- The first trade on the NSE was by East India Securities Ltd
- Amongst the banks, HDFC Bank carried out the first trade. The largest trade was by Standard Chartered Bank constituting 15,000 contracts. Banks contributed 40 percent of the total gross volume.
- Traded in NSE and MCX exchanges

Currency	Currency Code	Nation
United States dollar	USD (\$)	USA
Euro	EUR (€)	Europe Union
Japanese yen	JPY (¥)	Japan
Pound sterling	GBP (£)	United Kingdom
Swiss franc	CHF (Fr)	Switzerland

US Dollar (USD)

The US Dollar is by far the most widely traded currency In part, the widespread use of the US Dollar reflects its substantial international role as

Investment currency in many capital markets

Reserve currency held by many central banks

Transaction currency in many international commodity markets

Invoice currency in many contracts

Intervention currency employed by monetary authorities in market operations to influence their own exchange rates.

Do you know what a currency pair is ?

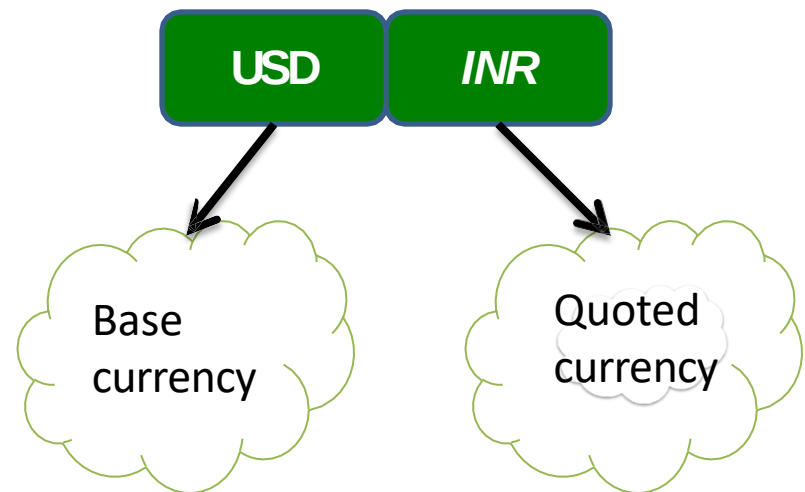

A currency pair are two currencies set together to illustrate currency valuation relative to one another in the **Foreign Exchange Market** . In currency market, while initiating a trade you buy one currency and sell another currency. Therefore same currency will have very different value against every other currency. For example, same **USD** is valued at say 60 against **INR** and say 82 against **JPY**.

The BC is the currency that is priced and its amount is fixed at one unit.

The other currency is the QC, which prices the BC, and its amount varies as the price of BC varies in the market.

What is base and quoted currency?

What is RBI reference

RBI Reference rate As on 08 Jun 2012

Underlying	Rate
USDINR	70.3640
EURINR	79.2125
GBPINR	91.6398
JPYINR	62.8800

Market Timing

In India, OTC market is open from 9:00 AM to 5:00 PM. However, for merchants the market is open from 9:00 AM to 4:30 PM and the last half hour is meant only for interbank dealings for banks to square off excess positions.

Central bank has prescribed certain net overnight open position limit for various banks. Banks cannot exceed their overnight open position beyond the prescribed limits and therefore the last half hour of trading window is used to offload excess position to adhere to the guidelines.

RBI reference rate is the rate published daily by RBI for spot rate for various currency pairs. The rates are arrived at by averaging the mean of the bid / offer rates polled from a few select banks during a random five minute window between 11:45 AM and 12:15 PM.

Contract Specifications Of Currency Futures

Product	Lotsize	Ticksize	TradingHrs	Settlement type
USD/INR	1000	INR 0.0025	Monday to Friday (9.00 am to 5.00 pm)	Cash settled in INR
EUR/INR	1000	INR 0.0025	Monday to Friday (9.00 am to 5.00 pm)	Cash settled in INR
GBP/INR	1000	INR 0.0025	Monday to Friday (9.00 am to 5.00 pm)	Cash settled in INR
JPY/INR	100000	INR 0.0025	Monday to Friday (9.00 am to 5.00 pm)	Cash settled in INR

FACTORS AFFECTING CURRENCY MOVEMENT

- 1. GDP Growth**
- 2. Fiscal and Monetary policy**
- 3. interest rate**
- 4. Inflation**
- 5. Inflow and Outflow of currency**
- 6. Local stock market performance**
- 7. RBI Policy**
- 8. FED interest rate**

What is a commodity market?

A commodity market facilitates trading in various commodities. It may be a spot or a derivatives market. In spot market, commodities are bought and sold for immediate delivery, whereas in derivatives market, various financial instruments based on commodities are traded. These financial instruments such as 'futures' are traded in exchanges.

What are the major Commodity Exchanges?

The Government of India permitted establishment of National-level Multi-Commodity exchanges in the year 2002 -03 and accordingly following exchanges have come into picture. They are

- Multi- Commodity Exchange
- National Commodity and Derivatives Exchange of India, Mumbai(NCDEX).
- National Multi Commodity Exchange, Ahmedabad (NMCE).
- Indian Commodity Exchange (ICEX)
- ACE Derivatives & Commodity Exchange Ltd

What Are the Main Drivers of Commodity Prices?

- Supply and Demand. As the supply and demand for commodities change, the price of the commodity will also change. ...
- Currency Movements. Commodities are generally priced in USD. ...
- Geopolitical Situations. ...
- Economic Growth. ...
- Mother Nature. ...
- Transportation and Storage Costs. ...

Margins for trading in commodities futures

Margin is the deposit money that needs to be paid to buy or sell each contract . The margin requirements for most futures contracts range from 2% to 15% of the value of the contract.

Types of margins

- Initial margin
- Maintenance margin
- Additional margin
- Mark – to - Market margin (MTM)

Order types available on the NCDEX system

Based on Time condition :

- Good till day order
- Good till cancelled (GTC)
- Good till date (GTD)
- Immediate or Cancel (IOC)
- All or none order
- Fill or kill order

Based on Price condition:

- Limit order
- Stop loss order

Financial planning for beginners (Portfolio making for beginner)

- **STEP 1 – What is PE Ratio**
- **STEP 2 – Base PE for Investment (BANK FD PE)**
- **STEP 3 – How to check Nifty PE**
- **STEP 4 – Importance of Nifty PE**
- **STEP 5 – Current PE of NIFTY**

What is Price ?

Price = Earning(EPS)*PE

What is PE Ratio ?

Current market price/Earning per share

Base PE of investment
(Bank FD PE)

If Bank FD interest rates are 5% in current scenario, so we can find that

Current Bank FD PE is **20***.

(If we have invested 100 rupees in FD then we will get return of 5 rupees. So to Bank FD PE=Price/Earning(100/5)

Importance of nifty PE

► **Current PE(nifty)= 26 (Variable)**

	A	B	C	D	E	F	G
1	Date	P/E					
2	1-Jul-21	28.26					
3	2-Jul-21	28.33					
4	5-Jul-21	28.53					
5	6-Jul-21	28.5					
6	7-Jul-21	28.62					
7	8-Jul-21	28.34					
8	9-Jul-21	28.27

19	27-Jul-21	27.45					
20	28-Jul-21	26.98					

FUNDS AS PER INDEX PE

PE RATIOS	FUNDS
Above 30	20%
26 to 30	40%
22 to 26	60%
18 to 22	80%
Below 18	90%

Financial planning for beginners

(portfolio making for beginners)

SECTORS	FUND ALLOCATION (IN%)
Equities	50
Debt Market	30
Gold(ETFs)	10
Fixed deposits	10

Investment (Index fund, mutual funds)	60%
Trading	40%

How to make
Happy,
Healthy &
Fearless Portfolio

SIX STEPS OF CREATING WEALTH IN LONG TERM

- **STEP 1** - CHECK PE OF NIFTY BASE PE IS 20
- BECAUSE INT RATES ON FD WE ARE GETTING 5% ($100/5=20$)
- BUT AS WE ALL KNOW INT RATES CAN GO UP 2.5 TO 3 BASIS THIS YEAR INT RATES WILL BE NEARLY 7 TO 7.5% .THAT WILL TAKE BASE PE OF NIFTY TO $100/7.5=13.33$
- SO RARTHER THAN 80:20 (AS PER OUR SLIDES) RATIO WE WILL GO WITH 60:40

- **STEP 2** - 60% OF 20 LAC =12 LAKH IN EQUITY AND 8 LAKH IN DEBT AND GOLD
- **STEP 3** - ALLOCATION OF 12 LAKH INSTEAD OF PUTTING MONEY IN INDIVIDUAL STOCK WE WILL GO WITH ETF TO AVOID CONTINUOUS WATCH ON RESULTS OF STOCKS AND DO PASSIVE INVESTING WHICH WILL BE MORE HASSEL FREE AND SAFE FOR LONGER PERIOD.

- Safe
- Happy
- Stress free portfolio
- You would be in top 150 even after 15 - 20 yrs
- Passive portfolio
- Averaging of portfolio

General Do's and Don'ts for Investor

Regulation

Do!

- ✓ Always deal only with SEBI registered intermediaries / authorized persons.
- ✓ Check with the Exchange to see whether the member is registered with the Exchange
- ✓ Please carry out due-diligence before registering as client with any Intermediary
- ✓ you are requested to carefully read and understand the terms and conditions and the contents stated in the Risk Disclosure Document
- ✓ Read and understand every document in the Registration Kit carefully before signing

DON'T

- ✓ Do not start trading until you have read and understood the Risk Disclosure document and Member-Client Agreement
- ✓ Do not deal with any third party / unregistered intermediaries / authorized Person
- ✓ Do not be misled by rumors or tips.
- ✓ Do not reveal your password to any other person.
- ✓ Do not accept unsigned / duplicate contract note

GOLDEN RULES OF TRADING

1. Follow the trend: - Don't be scared to buy at high prices and sell at low prices. Don't buy just because it's a low price and don't sell because it's high.
2. Don't expect to make profit every day;- if you think that you are a smart trader who can make profit on every trade then you are 100 % wrong.
3. Withdraw some profit time to time;- it is must for trader that they should take home some profit to see the growth of their money.
4. Don't trade with unclear mind;- exchanges will never go anywhere so trade only when you are sure about your trade.
5. Don't follow the rumors;- always follow the trend created by genuine news.

GOLDEN RULES OF TRADING

- 6.dont trade in highly volatile contract;- high volatility is very risky for your capital so stay out of such contract.
- 7.Dont trade many market in little capital;- if you have little capital then trade in limited market.
- 8.Dont trade unless you are well financed;- don't trade with borrowed fund.
- 9.Risk management;- manage your risk before trading or investing.
- 10.manage your emotions and expectation;- never believe in unrealistic profit from the market.

STEPS WHILE ENTERING IN THE FINANCIAL MARKET

1. Research the market very well.
2. Gather all the necessary data.
3. Make an investment idea.
4. Prepare a portfolio.
5. Trade it on paper not in practical.
6. Track it for next two months.
7. Identify your mistakes.
8. Learn from your mistake.
9. If you think that now you are ready for making money.
10. Lets trade
